

## PORTAL WITH BACK OFFICE INTEGRATION

**You are not in business without a good back office support!**

**You can't afford to run an in-house back office support!**

**Your web facility can do more!**

### Your competitiveness is getting compromised:

- You don't have any budget to run an efficient back office operation.
- You are not using your web facility to streamline your back office operation.
- Lack of available and skilled resources to keep your web facility current with new technologies and techniques.

### HOW DO WE HELP ?

- Do a thorough gap analysis to identify areas for improvements. Use a proprietary portal framework to accommodate a fast track development cycle i.e. design to implementation, to reduce your cost burden, to provide a secure and reliable back office solution.
- Enhance your IT support capability.
- We reduce the go-to market time frame by improving your operational efficiency.

### WHY ARE WE MORE EFFECTIVE ?

- Our true dual shore model offers cost effectiveness, improves operational efficiency and ensures utmost data security.
  - Dual shore methodology with one Onsite Lead for communications and co-ordination and customization team at offshore.
  - We provide business or customer specific portal templates for capturing requirements.
  - We capture requirements via Onsite Meetings and Conference Calls.
  - We develop Prototype and demonstrate to customers to ensure faster feedback.
  - Our Offshore team does the development and deploys at the Hosting Site.
  - We offer Hosting Services and different levels of maintenance plan.

### Advantages:

- Lower development cost to Customer as we used customizable portal frameworks.
- Prototypes and demos helped capture accurate requirements.
- Development turnaround time was short due to use of portal frameworks.
- Maintenance and Enhancements are continued as part of the Support package.
